

Author Scene Magazine

Author Scene is a collection of sixteen free fiction reader's online magazines that spotlight different genres and sub-genres. We worked very closely with the company to create a website that they could edit and update themselves. Mission accomplished!

Each issue covers a wide range of different topics written by authors in these genres, as well as, the popular "Judging a Book by its Back Cover" article. Each issue also spotlights one very talented author who has found a home in that genre.
